

Crafts

Making your own Bubble Wand

Materials needed:

Pipe Cleaners
1/2 cup of washing-up liquid
Water
Dollop of hair gel
Wide tray

Method:

Twist the pipe cleaners into any shape you want, but it should have a wand base.
Mix the washing-up liquid, water and hair gel together (the gel helps the bubbles last longer!)
Fill the tray with the bubble solution and have fun!

Clay Beads

Ingredients:

3/4 cup of flour
1/2 cup of salt
1/2 cup of cornstarch
Warm water
Paint
String

Method:

Mix dry ingredients together.
Gradually add warm water until the mixture can be kneaded into shapes. Have an adult help you so you can get the right 'doughy' thickness. Form beads by breaking dough into little balls, rolling it to the desired shape, then piercing the balls with toothpicks. Allow beads to dry.
When dry, paint and string the beads.
